

Lantmännen's Greenhouse

Bread goes future – set your ideas free!

We must re-think our food production, if we want to live off our land in the future. This is what we do at Vaasan and at Lantmännen, a Swedish agricultural cooperative that owns Vaasan. But we need more people who think differently in order to produce tasty and healthy food for our future generations.

Do you have an idea about the future of bread? Do you have fresh insight on oat to complement our expertise? Maybe a way to reduce climate impacts in the bread chain?

Apply to Greenhouse – together we'll create the bread innovations of tomorrow!
